

ISSUE DATE December 13, 2018	EFFECTIVE DATE December 17, 2018	NUMBER *See below
SUBJECT Prior Authorization of Hypoglycemics, SGLT2 Inhibitors – Pharmacy Services	BY  Sally A. Kozak, Deputy Secretary Office of Medical Assistance Programs	

IMPORTANT REMINDER: All providers must revalidate the Medical Assistance (MA) enrollment of each service location every 5 years. Providers should log into PROMISE to check the revalidation dates of each service location and submit revalidation applications at least 60 days prior to the revalidation dates. Enrollment (revalidation) applications may be found at:
http://www.dhs.pa.gov/provider/promise/enrollmentinformation/S_001994.

PURPOSE:

The purpose of this bulletin is to issue updated handbook pages that include the requirements for prior authorization and the type of information needed to evaluate the medical necessity of prescriptions for Hypoglycemics, SGLT2 Inhibitors submitted for prior authorization.

SCOPE:

This bulletin applies to all licensed pharmacies and prescribers enrolled in the Medical Assistance (MA) Program and providing services in the fee-for-service delivery system. Providers rendering services under the MA managed care delivery system should address any questions related to Hypoglycemics, SGLT2 Inhibitors to the appropriate managed care organization.

BACKGROUND:

The Department of Human Services' (DHS) Drug Utilization Review (DUR) Board meets semi-annually to review provider prescribing and dispensing practices for efficacy, safety, and

quality and to recommend interventions for prescribers and pharmacists through the DHS Prospective Drug Use Review and Retrospective Drug Use Review programs.

DISCUSSION:

During the September 25, 2018, DUR Board meeting, the DUR Board recommended removing multiple elements from the medical necessity guidelines for Hypoglycemics, SGLT2 Inhibitors based on the recommendations of multiple national treatment guidelines to individualize drug therapy and the lack of compelling medical literature and guidelines that definitively support the use of specific classes of hypoglycemics as second-line choices. The DUR Board also recommended automating prior authorization of preferred Hypoglycemics, SGLT2 Inhibitors. The proposed revisions to the guidelines to determine medical necessity, as recommended by the DUR Board, were subject to public review and comment, and subsequently approved for implementation by DHS.

PROCEDURE:

The procedures for prescribers to request prior authorization of Hypoglycemics, SGLT2 Inhibitors, are located in SECTION I of the Prior Authorization of Pharmaceutical Services Handbook. DHS will take into account the elements specified in the clinical review guidelines (which are included in the provider handbook pages in the SECTION II chapter related to Hypoglycemics, SGLT2 Inhibitors) when reviewing the prior authorization request to determine medical necessity.

As set forth in 55 Pa. Code § 1101.67(a), the procedures described in the handbook pages must be followed to ensure appropriate and timely processing of prior authorization requests for drugs that require prior authorization.

Hypoglycemics, SGLT2 Inhibitors

MEDICAL ASSISTANCE HANDBOOK
PRIOR AUTHORIZATION OF PHARMACEUTICAL SERVICES

I. Requirements for Prior Authorization of Hypoglycemics, SGLT2 Inhibitors

A. Prescriptions That Require Prior Authorization

All prescriptions for Hypoglycemics, SGLT2 Inhibitors must be prior authorized.

1. See the Preferred Drug List (PDL) for the list of preferred and non-preferred Hypoglycemics, SGLT2 Inhibitors at:
<https://papdl.com/preferred-drug-list>.
2. The list of drugs that are subject to quantity limits, with accompanying quantity limits, is available at:
<http://www.dhs.pa.gov/provider/pharmacyservices/quantitylimitslist/index.htm>.

B. Review of Documentation for Medical Necessity

In evaluating a request for prior authorization of a prescription for a Hypoglycemics, SGLT2 Inhibitor, the determination of whether the requested prescription is medically necessary will take into account whether the beneficiary:

1. Has a diagnosis of type 2 diabetes mellitus

AND

2. Has a documented history of:
 - a. Failure to achieve glycemic control as evidenced by the beneficiary's HbA1c values using maximum tolerated doses of metformin

OR

- b. A contraindication or intolerance to metformin

AND

3. For a non-preferred Hypoglycemics, SGLT2 Inhibitor, has a history of therapeutic failure, contraindication, or intolerance of the preferred Hypoglycemics, SGLT2 Inhibitors

AND

MEDICAL ASSISTANCE HANDBOOK
PRIOR AUTHORIZATION OF PHARMACEUTICAL SERVICES

4. If a prescription for a Hypoglycemics, SGLT2 Inhibitor is in a quantity that exceeds the quantity limit, the determination of whether the prescription is medically necessary will also take into account the guidelines set forth in the Quantity Limits Chapter.

NOTE: If the beneficiary does not meet the clinical review guidelines listed above but, in the professional judgment of the physician reviewer, the services are medically necessary to meet the medical needs of the beneficiary, the request for prior authorization will be approved.

C. Automated Prior Authorization

Prior authorization of a prescription for a preferred Hypoglycemics, SGLT2 Inhibitor with a prescribed quantity that does not exceed the quantity limit will be automatically approved when the Point-of-Sale On-Line Claims Adjudication System verifies a record of a paid claim(s) within 90 days of the date of service that documents that the guidelines to determine medical necessity listed in Section B. have been met.

D. Clinical Review Process

Prior authorization personnel will review the request for prior authorization and apply the clinical guidelines in Section B. above to assess the medical necessity of a prescription for a Hypoglycemics, SGLT2 Inhibitor. If the guidelines in Section B. are met, the reviewer will prior authorize the prescription. If the guidelines are not met, the prior authorization request will be referred to a physician reviewer for a medical necessity determination. Such a request for prior authorization will be approved when, in the professional judgment of the physician reviewer, the services are medically necessary to meet the medical needs of the beneficiary.
