

PSAE Claims

In addition to reporting other appropriate diagnosis codes on claims, the nursing facility (NF) must also report one of the following ICD 9 or 10 codes to specify an event occurring in a residential setting which has been determined to be a PSAE:

- For dates of service **before 10/1/2015**: use ICD-9 Code **E849.7**
- For dates of service **10/1/2015 and later**: use ICD-10 Code **Y92.199**

Note: When completing claim diagnosis code fields do not use a decimal point.

- For paper claims on the UB04, under Other Diagnosis Codes.
- For Internet billing, in the Emergency Code Field.
- For the 837I transaction, obtain direction from your Clearinghouse or application developer.

Claims pertaining to identified PSAEs or services to correct or treat PSAEs are completed as follows:

- The day of the PSAE should be reported as a non-covered day.
- Any PSAE related hospital reserve bed days should be reported as non-covered days.
- Other days as determined by the NF to additionally satisfy Act 1 requirements should also be reported as non-covered days.

Note: Refer to Section 2 of the final bulletin (relating to Guidelines: Claims Relating to PSAEs and to Services to Correct or Treat the PSAE) for additional instruction for other adjustments.
